PROFESSIONAL SUMMARY

Systems Analysis and Development student seeking to enter the software development field within challenging corporate environments. I combine hands-on Full Stack development experience (freelance projects using Node.js and React) with corporate experience in an administrative role, where I proactively developed Python automations to optimize financial routines. Currently deepening my knowledge in C# and the .NET ecosystem to align my technical profile with the demands of large financial institutions.

EXPERIENCE

CRMap
Junior Developer   *08/2024 – Present*

- Development and maintenance of APIs using C# and .NET
- Data modeling and persistence with PostgreSQL
- Development and enhancement of mobile features using React Native
- Integration of REST APIs with NestJS and internal services
- Support for versioning, CI/CD pipelines and workflows using Azure DevOps
- Experience working in an Agile (Scrum) environment

Fundação Visconde de Porto Seguro
Financial Administrative Intern   *08/2024 - 02/2026*

- Document management, bookkeeping and invoice processing
- Vendor registration and system updates
- Preparation of financial reports to support management decisions
- Support for operational demands within the finance team
- Developed a **Python** automation to eliminate repetitive manual tasks, improving efficiency, accuracy and internal process speed

DevMonk
Full Stack Developer (Freelance)   *11/2022 - 02/2023*

- Developed a Full Stack application using **React**, **Node.js** and **MongoDB**
- Built UI components based on **Figma** prototypes
- Participated in sprint planning, backlog prioritization and architecture alignment with the team
